## AUTHOR BIOGRAPHIES

**Sylvia Allegretto, Ph.D.**, is an economist and Deputy Chair of the Center on Wage and Employment Dynamics at the UC Berkeley Institute for Research on Labor and Employment. Previously, she worked at the Economic Policy Institute (EPI) where she co-authored two editions of *The State of Working America* (with L. Mishel and J. Bernstein). Dr. Allegretto has published numerous working papers and journal articles on economic inequality, unemployment duration, family budgets, low wage labor markets, the minimum wage, and the sub-minimum wage received by tipped workers. She received her Ph.D. in Economics from the University of Colorado, Boulder.

**Beth A. Almeida** is an economist who researches, writes, and consults on retirement issues. Previously, she served as the first Executive Director of the National Institute on Retirement Security (NIRS). Before joining NIRS, she served as Assistant Director for Strategic Resources for the International Association of Machinists and Aerospace Workers, where she played a key role in pension and benefit restructuring during the post-9/11 airline industry crisis. Her research on retirement issues has been published in edited volumes and cited in Congressional testimony, national media, and trade media. She earned an M.A. in Economics from the University of Massachusetts Amherst.

**Christina A. Clarke, Ph.D., M.P.H.**, is an epidemiologist at the Cancer Prevention Institute of California (CPIC), and a Consulting Assistant Professor at the Stanford Cancer Institute. As Co-Investigator for the Greater Bay Area Cancer Registry—part of the National Cancer Institute’s Surveillance Epidemiology and End Results (SEER) program and the California Cancer Registry—Dr. Clarke monitors changes in cancer incidence and survival patterns among various population subgroups, particularly those defined by geography, race/ethnicity, and socioeconomic status. She received her M.P.H. in Epidemiology from Tulane University, and her Ph.D. in Epidemiology from UC Berkeley.

**Teresa Ghilarducci, Ph.D.**, is a labor economist and nationally-recognized expert in retirement security. She is Professor of Economics, the Bernard L. and Irene Schwartz Chair in Economic Policy Analysis, and Director of the Schwartz Center for Economic Policy Analysis at The New School. Previously, she was a professor of Economics for 25 years at the University of Notre Dame, where she served for 10 years as Director of the school’s Higgins Labor Research Center. She is author of *When I’m Sixty Four: The Plot Against Pensions and the Plan to Save Them* and *Labor’s Capital: The Economics and Politics of Employer Pensions*, and co-author of *Portable Pension Plans for Casual Labor Markets* (with G. Mangum, J. Peterson, and P. Phillips). Professor Ghilarducci frequently testifies before the U.S. Congress and is a media source on pensions and labor economics.

**Jacob S. Hacker, Ph.D.**, is Stanley Resor Professor of Political Science and Director of the Institution for Social and Policy Studies at Yale University. An expert on the politics of US health and social policy in cross-national perspective, he is the author of several books including *The Great Risk Shift*; *The Divided Welfare State: The Battle over Public and Private Benefits in the United States*; and *Winner-Take-All Politics: How Washington Made the Rich Richer—And Turned Its Back on the Middle Class* (with Paul Pierson). Professor Hacker has also authored a wide range of popular writings on American politics and public policy, with a focus on health and economic security.

**Amal Harrati** is a Ph.D. candidate in the Department of Demography at UC Berkeley. Her current research focuses on the relationship between health and economic outcomes at older ages. Her research interests include social security and retirement, health care reform, and elderly well-being. Prior to her doctoral studies, she worked as a research analyst at Harvard University's Joint Center for Housing Studies studying housing demographics. She received her M.A. in Economics from UC Santa Barbara and her B.A. in Economics from UC Los Angeles.

**Nari Rhee, Ph.D.**, is a staff researcher at the UC Berkeley Center for Labor Research and Education (CLRE) where she coordinates the Retirement Security Project. She was previously a Postdoctoral Researcher and Visiting Scholar at CLRE. Dr. Rhee has published journal articles and working papers on a range of issues affecting low-wage workers and working families, including regional income inequality and poverty, local economic development policy reform, workforce development in long term care, and pensions and retirement security. She received her M.A. in Urban Planning from UC Los Angeles and her Ph.D. in Geography from UC Berkeley.

**Joelle Saad-Lessler, Ph.D.**, is Assistant Professor of Economics at Long Island University and a research economist at the Schwartz Center for Economic Policy Analysis (SCEPA). She has extensive experience in econometric modeling, statistical programming, and data analysis. Dr. Saad-Lessler's publications span a range of issues, from the impact of immigration on local wages, to the economics of international child labor, and the economic impact of global warming. She received her Ph.D. in Economics from Columbia University.

**Lauren Schmitz** is a Ph.D. student in economics at the New School for Social Research, and a research assistant at the Schwartz Center for Economic Policy Analysis (SCEPA). Her past work has been on public and international economics, including evaluating the efficacy of public funding for cultural and social nonprofits and work on the causes and consequences of global imbalances. Currently, her work at SCEPA is focused on retirement policy and pension reform, including the relationship between US labor market conditions and the employer provision of fringe benefits.

**Anthony Webb, Ph.D.**, is a research economist at the Center for Retirement Research at Boston College. Dr. Webb's published research includes a number of studies of annuity markets, the role of annuities in managing wealth decumulation in retirement, the Social Security claiming decision, and the impact of aggregate mortality risk on annuity providers and sponsors of defined benefit pension plans. He received his Ph.D. in Economics from UC San Diego. Previously, he was employed as an economic adviser to the British government, providing policy advice on taxation of personal savings.

**Christian E. Weller, Ph.D.**, is Associate Professor of Public Policy at the University of Massachusetts Boston; Senior Fellow at the Center for American Progress; a research scholar at the University of Massachusetts Amherst's Political Economy Research Institute; an institute fellow at the University of Massachusetts Boston's Gerontology Institute; and a research associate at the Economic Policy Institute. Professor Weller has published extensively on retirement security and pensions. His work is frequently cited in the press and he is often a guest on national TV and radio programs. He is editor of *Retirement Security in the Great Recession*; co-author of *Retirement Income: The Crucial Role of Social Security* (with E. Wolff), and co-editor of *Employee Pensions: Policies, Problems and Possibilities* (with T. Ghilarducci). He holds a Ph.D. in Economics from the University of Massachusetts Amherst.
